

PROJECT SCOPE

The roadway will be completely removed, new curb and gutter and pavement will be placed.

- City utilities (Watermain & Sanitary Sewer) will be replaced in its entirety.
- Sanitary Services will be replaced up to 10-feet from the property line.
- Water services will be replaced up to existing curb stop, including the curb stop.
- Storm Sewer structures will be added to improve drainage.
- Sidewalks will be reconstructed on both sides of 7th Avenue from St. Mark's Road to Pierce Street.

PROJECT AREA MAP

CONTRACT

Shakopee City Council awarded the contract for the 2015 Street Reconstruction to the low bidder, Chard Tiling & Excavating, Belle Plaine, MN.

PROJECT DATES & SCHEDULE

Phase 1

The contractor anticipates starting Phase 1 on June 1st by placing traffic control and hooking up temporary water. They will also remove the bituminous surface and curb and gutter by the end of that week. The utility contractor will start utility reconstruction the week of June 8th.

Phase 2

Phase 2 construction will follow Phase 1 and is tentatively scheduled to begin around the end of June. Temporary water pipes and removals will mark the start of construction on Phase 2.

Completion

The project is scheduled to be completed in early October 2015.

The City will attempt to post general weekly project updates on our website (www.shakopeemn.gov) once construction begins.

Construction schedules will vary due to delays caused by on-site conditions, weather and subcontractor availability.

WHO DO I CALL?

The construction observer for the project is Ryan Halverson. Ryan will be on-site everyday and calling him is the most efficient means for you to get answers. Contact Ryan anytime for updated scheduling information. His contact information is:

Mobile Phone: (612) 490-1581

Office Phone: (952) 233-9366

Email Address: rhalverson@shakopeemn.gov

You may also contact the contractor. The project manager for this project is Tim Culp, Chard Tiling & Excavating (952) 873-6152.

EMERGENCY CONTACTS

If there is a project related emergency after hours please call the following numbers:

Dan Chard (612) 685-8867

(Street, sanitary or storm sewer, traffic control)

Shakopee Public Utilities (952) 445-6681

(Temporary water issues)

Scott County Dispatch (952) 445-1411

(Only if you cannot reach any one else)

GARBAGE CONTAINERS:

Occasionally the contractor will move your garbage container on pickup day to help facilitate garbage collection. Please put your address on the top of your container to ensure the containers get returned to the correct property. Your garbage will be picked up on the same day, but, they will be picking up the garbage at 7a.m. to avoid conflict. Please have your container curbside before 7a.m regardless of the condition of your street.

SPRINKLER SYSTEMS AND DOG FENCES

The City Right-of-Way extends approximately 20 feet from the back of curb and gutter. Please remove all underground fencing within City right-of-way ASAP. Please mark portions of your sprinkler system located within City right-of-way.

TREE REMOVAL

Some trees will be removed only where they interfere with sanitary service line or water service line construction. Contact Ryan Halverson if you want more information on what trees will be removed.

SOD

After sod is placed, the contractor will water it for 30 days. We would encourage you to assist the contractor in watering during this time. After that, you will be responsible for watering. The new sod will need more water than the rest of your yard this year and next year. After the sod is accepted 30 days after placement the City will not come back and replace it. Please notify Ryan Halverson ASAP if you have any issues with the sod.

PRIVATE WORK

If you are interested in replacing your driveway all the way to your house with a new concrete driveway, Chard Tiling & Excavating will provide quotes to replace your driveway. Contact Lance Schmitt at (952) 873-6152.

If you are going to have another contractor in to do any work, please have them contact Ryan Halverson ASAP so we can coordinate the work.

ACCESS

It is our intent to provide access to your driveway at the end of each work day. You will not have access to your driveway for 7 days after the curb is poured. If you have a concrete driveway, you will also not have access for 7 days after the drive is poured. If this creates a hardship for you, please contact Ryan Halverson at (612) 490-1581. The City Council would like you to know that you can park on your lawn during the project if access is an issue.

CONCRETE

Please do not drive on any new concrete curb & gutter for 7 days and driveways for 7 days to allow the concrete to cure.

LANDSCAPING

Please remove all landscaping you want to save from City right-of-way. Contact Ryan Halverson if you would like to know the contractor's removal limits adjacent to your property.

TEMPORARY WATER

A majority of the watermain within the project area will be replaced as part of this project. As a result, you will be put on temporary water over the summer. Temporary water consists of temporary pipes above ground attached to your outside spigot.

Because the pipes are over ground, your water will be at a warmer temperature. It will probably be necessary to refrigerate your drinking water. You may have a slight drop in pressure. However, your water softeners and sprinkler systems should not be affected. The contractor will need to enter your house to connect the temporary system. If you have questions, he will be more than willing to answer them.
